# Wireless Network Setup Guide for Apple IOS Devices

<div style="border: 1px solid black">

## What network do I connect to?

**Delta_Guest:** If you want to only logon for an 8 hour period and don't want the wireless network to remember your device, connect here and then launch a browser. You will be prompted to login to the Guest Portal.

**Delta_Secure:** If you just want your device to automatically connect every time your're on campus, follow the guide below. You will have to configure each device only one time. The Wireless Network will remember you until you have to change your Delta College Username and Password.

</div>

**To configure your device to connect to Delta_Secure**

1. From the home screen, choose **Settings**.
2. Touch **Wi-Fi** from the menu on the left.
3. Choose **Delta_Secure** from the list of wireless networks on the right.
4. A prompt will appear asking for your username and password
5. Enter your Delta College username and password into the box.
6. Choose **Join**.
7. You will be presented with a prompt to accept a certificate into your profile.
   - **Note:** The name of the certificate should end with **Delta.edu**
8. Accept this certificate
9. You'll now see a checkmark next to the Delta_Secure wireless network.
10. Because you've gone through these steps, your device will now be able to connect to the Delta College wireless network in the future without having to login again.

Please review the College's **Access and Use Guidelines** for personal device use located at:
