

Program Outcomes

Program Name: PHYSICAL THERAPIST ASSISTANT
Division: Health and Wellness
Discipline: Physical Therapist Assistant **Contact Person:** Jamie Duley

Outcomes

Provide learning environments for our students that are clean, safe and comparable to what they will encounter in actual work environments.

Provide and direct the student to information and resources that might enhance their education and preparation as a physical therapist assistant.

Provide stimulus to the physical therapist assistant student and graduate to augment and support activities of the physical therapy profession and of the community.

Provide motivation for continuous learning.

Provide the community with an adequate supply of competent physical therapist assistants who will be able to adapt to the many variables of treatment situations by using their problem-solving and critical thinking abilities within the guidelines of established procedures and the established plan of care

Provide a core of learning experiences in which the physical therapist assistant develops knowledge and appreciation of other allied health personnel's contribution to quality patient care with a basic understanding of the health care system.

Prepare graduates with the knowledge, skills, values, and professional behaviors expected of a competent entry-level physical therapist assistant.
