

SCOOTERS (AMIGOS)

Delta College goes beyond the requirements of the law to provide a fleet of eight (8) electric scooters to minimize mobility impairments for students, staff, faculty, and visitors to the campus. This is a courtesy service of the College, and is meant for special events/activities, or for short term mobility needs based on medical documentation or other special circumstances. Scooters are signed-out from the Disability Services' office on a daily or activity basis by filling out a [Delta College Mobility Scooter Procedure Form](#) and leaving a driver's license or student identification as security. In special cases arrangements can be ahead of time by contacting the office.

USEAGE GUIDELINES

1. Scooters are meant for one-time or event-by-event use, and are kept ready by having on-board electrical charging units that can be plugged into any wall socket. Users usually find them plugged in and ready to use, and are encouraged to plug them back into wall sockets after they are done.
2. Scooters may be reserved for short periods of time (e.g. daily, weekly) under special circumstances, as long as special requests are received far enough in advance of an event to allow for reservation.
3. For Delta faculty/staff *only*: Temporary assignments may also be made under documented medical situations such as recovery from an accident or illness that significantly limits mobility. These time-specific arrangements are usually made through the offices of Human Resources and Disability Services.
4. Scooters are never reserved for a semester period by a Delta student; this level of need crosses over to personal equipment needs, rather than a college-provided accommodation.
5. Users are approved to take scooters to virtually any indoor area of the facility – into classrooms, auditoriums, cafeterias/break areas, hallways, restrooms, the gymnasium, etc. Scooters are not allowed out of doors, unless a special request has been made of Disability Services' staff to meet a user in a specific parking lot or loading/unloading area.

6. The College does not assume responsibility for any personal items or property left behind on the scooter or in its basket, following its use.

7. If a scooter is discovered to be inoperable, or it breaks down during its use, the mishap is to be reported to the Office of Disability Services. The scooter will be taken to, or picked up by staff of the Facility Management Department. Repair or parts' replacement decisions are made by Facility Management technicians, and associated costs are charged to Disability Service's account.

For more information on the availability and use of electric scooters, or to report any situation involving scooters, call Disability Services, 686-9330
