Delta College Chemical Technology Program Mission Statement

The mission of the Delta College Chemical Technology Program is to provide resources and educational opportunities for Delta College students to produce a diverse pool of graduates who will meet or exceed the requirements to enter the workforce as competent chemical technologists.

Students will:

- **Engage in the scientific process independently and in teams**
- **Apply mathematical and chemical principles in the design and development of laboratory experiments while adhering to safety, health and environmental regulations.**
- **Communicate and present their scientific observations and findings**
