Program Assessment Report
Program: HISTORY
Year: 19/20
Division: Social Sciences
Contact: Amy French

Actions Taken in Response to Last Year's Report

Rationale for Current Assessments

Assessment 1 of 1

Goal / Project

Outcome(s)
Describe and analyze historical sources. (16/17)

Standard / Objective
Outcome: evaluate conflicting historical interpretations Objective: 75% of students proficient.

Method of assessment
Capstone Demonstrations(s)

Comment/Details about the method of assessment
Professors used individual assignments to assess how our students are evaluating conflicting historical interpretations. As this is a general history outcome, we assessed it across the board in all of our classes from as many professors as would participate.

Courses Affected
HIS 111, HIS 112, HIS 222, HIS 237, HIS 240

Time Frame
Winter Semester 2020

Submitted By
Amy French

Result

Result
(2) Results met expectation/standard

Data Collection (general or specific stats regarding results)
89% of 225 students studied met expectations (75% or higher on assessment); 67% of students mastered the outcome (84% or higher); 11% of students didn't meet expectations (74% or lower)

What We Learned (areas for improvements, strengths, etc.)
Students are generally able to evaluate conflicting historical interpretations, but a lot of groundwork had to be set to get them up to speed. This skill was developed after the professor had laddered the course to teach this essential objective.
Use of Data to Improve Student Success

• One professor thought it might be helpful to have a general discussion about primary versus secondary sources in history at the beginning of class and the fact that—just as in the present—not all sources are to be trusted. This discussion could also include a talk about what to look for in sources that might indicate they are more truthful. Also, need to discuss what historians do—we do not just present facts, but actually write the past and create history. To do so we must construct a developed argument based on a good deal of historical evidence.

Discipline/Program Comments

“• One professor wondered if perhaps the results would have been lower if they had used an obscure historiography example. For example, if I had done a lecture about the debate over whether the U.S. should have bombed Auschwitz, the complexity of the material may have obscured the lesson about conflicting viewpoints. . . • One professor questioned where they graded too easily. • One professor found that in-class scores were better on average than online classes. • A professor noticed that students found it easier when they gave them a specific question requiring critical analysis than a more general one. ”

Advisory Board Comments

Assessment Committee Comments

So, the assignments were unique to each instructor (based on the statements made in Comments about details of the method of assessment)… was there a common rubric? .. even if it was a crude rubric (3 = great, 2 = good, etc.) like the Gen Ed rubric on a scale of 0 - 3.
