Wireless Network Setup Guide for Mac Devices

> ## What network do I connect to?
>
> **Delta_Guest:** If you want to only logon for an 8 hour period and don't want the wireless network to remember your device, connect here and then launch a browser. You will be prompted to login to the Guest Portal.
>
> **Delta_Secure:** If you just want your device to automatically connect every time your're on campus, follow the guide below. You will have to configure each device only one time. The Wireless Network will remember you until you have to change your Delta College Username and Password.

To configure your device to connect to Delta_Secure

1. Click on the Wi-Fi Icon at the top of the screen
2. Choose the **Delta_Secure** wireless network
3. You will be presented with a screen requesting your username and password.
4. Enter your Delta College username and password.
5. Click **Join.**
6. You will be presented with a **Verify Certificate** window.
   - Please note that the name of the certificate should end with **Delta.edu**
7. Click **Continue**.
8. Your Mac may prompt you to allow this change to be made to your computer.
   - You would enter the username and password that you use to make configuration changes to your laptop.
   - **NOTE:** If you're connecting with a personal device, this will <u>not</u> be your Delta College username and password.
9. Click **Update Settings** to continue.
10. After a few seconds, if you click on the Wi-Fi icon at the top of the screen, you'll see a checkmark next to **Delta_Secure**.
11. You're now connected!
12. Because you have gone through these steps, your device will now be able to connect to the Delta College wireless network in the future without having to login again.

Please review the College's **Access and Use Guidelines** for personal device use located at:
