TABLE OF CONTENTS

EXECUTIVE SUMMARY

EXECUTIVE SUMMARY

This study documents the Main Building, Utility Building, Maintenance Building, Farm buildings and Planetarium, by area utilizing a brief narrative study, detailed spreadsheets and a drawing package for equipment locations. The three components (Narrative Study, Spreadsheets and Drawings) of this study are to function to assist with maintenance planning, however the spreadsheet is the primary tool.

The spreadsheet lists the equipment and building systems along with the observed condition and estimated age of each item. Industry standards are used to determine estimated standard life and the remaining approximate service life is listed. The deficiencies and concerns identified are then prioritized based on age, condition and an evaluation of the impact of a failure.
Overall, where concerns were found, they were primarily due to the age of the systems in question. Everything was found to be in well maintained condition for its age and use. There are however many building components that are beyond their normal service life and in need of attention.

From a Site standpoint, the parking lots are in need of an overall topcoat and resurfacing, there are several structures that need repair before the resurfacing. There are several areas where ADA egress is inhibited by sidewalk heaving or cracking.
The architectural concerns identified in this study generally are identified as exterior door condition and hardware configuration, building exterior wall crack and repair, corrosion on window frames and doors and a generally aging finishes such as flooring, millwork and ceiling tiles.

Mechanically, the concerns are centered around aging air handling systems including inefficient multizone units that should be considered for replacement. There are also several pieces of hydronic equipment including heat exchangers, circulating pumps and condensate return pumps that are beyond their service life and likely to cause high maintenance attention if not replaced.
The primary energy plant serving the campus is in generally good condition and is well maintained. One newer boiler should be considered to increase the system reliability and efficiency as the main boilers age. The cooling towers are beyond their normal service life and should be systematically replaced or rebuilt in order to increase the campus cooling system reliability.

Electrically, there is evidence of a systematic conversion to LED lighting. Although many areas still have fluorescent fixtures and some minor areas of incandescent fixtures, however, fluorescent and incandescent fixtures have been retrofitted with LED lamps. Lighting control is achieved through occupancy/daylight sensors and building control systems.

Some electrical panels and substations in the building are original and beyond normal service life, however, they are maintained well and serviced accordingly. Panels and equipment that are 50+ years old should be planned on replacement in the near future.

The fire alarm systems installed through most areas are over 20 years old and should be planned on being replaced in the near future.

Several conditions arose out of building discussions for future improvements needed to the campus:

The Planetarium Chiller is in need of replacement due to a combination of age and problems experienced with the chiller, the chiller is to be replaced. Along with the chiller replacement, the pumps should be replaced and pump accessories (valves, strainers, etc.). Consideration for the addition of a buffer tank to reduce short-cycling of the compressors during light loads should also be included.

The pool equipment room has a high level of humidity and aeriated chlorine in the air. A dedicated ventilation system including outdoor air and exhaust air should be added to reduce the concentration and its corrosion impact on items within the room.

The campus uses an outdoor water tower for domestic and fire protection water supply. The tower is connected to the piping that loops the campus. Because of the piping arrangement, on a daily basis the filling of the tower causes a water shortage in the campus loop. The tower is filled by pressure booster pumps that draw their water from the same main that feeds the tower and feeds the campus. The piping system should be studied to determine what modifications would be necessary to allow for simultaneous filling of the pump while maintaining pressure on the campus loop.

The kitchen serving the campus utilizes a grease separation system for addressing cooking grease to protect the sanitary piping system, as is required by the Michigan Plumbing Code. The initial design of the system had a warming system to re-liquify the grease and pump it to a tank. The heaters have failed and were generally unreliable from the initial installation forcing the college to hire a sanitary pumping service to pump out the holding tank. Because the system was not designed for this approach, the location for the pumping access points and the configuration of the system make this a difficult process. Consideration to study the system further to either replace the heating/pumping system or make the access point more accessible should be undertaken.

The present wood dust collector is beyond normal service life and although it is functioning, it should be reconditioned for efficiency and effectiveness. Along with the review, consideration can be given to recycling the clean air or applying energy recovery in order to improve campus energy consumption.

Portions of the campus utilized grooved couplings for the heating hot water system. This is often applied because it is generally more efficient to install in an existing system than welding for larger pipes. The campus has been experiencing seasonal leaks in the system as the system is cooled down and then rewarmed for the next season. The leaking us due to normal wear on the system at the couplings, however, the unpredictable nature of the leaks causes significant damage to ceiling tiles. During each renovation of an area, the piping or piping joints should be replaced to avoid future problems in renovated areas.

The structural support for exterior piping at the chilled water ice storage equipment is showing significant signs of rust. A full scraping and galvanizing of the piping should be considered. The existing cooling towers are performing well and there is a stand-by tower in the system, however because the campus is

dependent on the system, the N+1 nature of the tower system should be maintained. Reconditioning of the tower should be considered.

The water service to the “Farmhouse” portion of the campus comes from the main campus. The unusually long run of the piping has been a significant source of maintenance problems each year due to the elevational changes in the piping and distance. Because the meeting-use of the farmhouse area, maintaining the larger water service is appropriate. Further study should be undertaken to determine if a deeper installation (below frost) is needed, alternative materials should be considered or a dedicated water service for the farmhouse is most appropriate.

The F-Wing of the main campus building has been experienced footing drain clogs causing backups within the building. There are piping irregularities at the southwestern most corner of this piping contributing to the problem that should be addressed through replacement or rerouting.

INTRODUCTION

INTRODUCTION

The purpose of this study is to provide a conditional assessment of the Delta College buildings and campus. It is to provide an overview of the architectural, structural, mechanical, plumbing, electrical and low voltage systems of the buildings, their condition and establish a prioritized means for system replacement and upgrade. The buildings consist of the following:

DELTA COLLEGE	ADDRESS	SQUARE FEET	Yr. BUILT
Planetarium & Science Center	100 Center Ave, Bay City, MI	39204	1996
A Wing	1961 Delta Road, University Center, MI	153406	1961

Farm Shed	Delta Road, University Center, MI	1020	1890
Farm Tool Shed	Delta Road, University Center, MI	1320	1930
Farm Pavilion	Delta Road, University Center, MI	960	1984

BUILDING ANALYSIS

BUILDING ANALYSIS

The composite building consists of Wings sixteen wings, lettered A through P (skipping I and O), but including S and Z. All the wings are connected at the main level but also include some interconnecting utility tunnels. The wings have some separation by Colleges. Four additional building areas, Facilities, Grounds, the Farm area and a remote Planetarium were also included in the study. Altogether, the areas studied include almost one million square feet. The building construction generally ranges from 1960 to present, with exception of the historical farms were which were constructed in 1870, 80 and 90. The objective of this study is to establish maintenance and building planning in the coming decade as well as to outline general condition.

As an architectural overview, the buildings are generally in good condition. With exception of some cracking of exterior walls, all of the features of the building are in good condition relative to their age and material type but are showing signs of aging. The parking lots, generally asphalt, are in need of resurfacing along with considerable patching.

Exterior walls: The exterior walls of the building have areas within every wing where cracks have formed. In some areas the cracks are more significant and should receive immediate attention. Other areas are minor fractures where infill and caulking is needed and then a schedule should be established for regular review to determine the crack growth and expansion.

The roof of the building is under a regular maintenance program and has received ongoing attention. The roofing repairs and replacements have been systematic and have generally left the roofs in good condition due to the vigilant approach to maintenance.

Exterior doors and windows are one of the areas where age is showing. There is considerable corrosion on the windows and doors with some reaching a point of infiltration and water penetration into the buildings. In most cases, minor repairs and preventive maintenance should be applied. Generally speaking, window replacement is never financed in a reasonable amount of time by the energy savings, however, in any major renovation window replacement should be reviewed and strongly considered. Exterior door and door hardware, however, is a significant issue around the building and a replacement program should be considered, methodically

addressing those doors in the worse condition and allowing infiltration in the most vulnerable areas.

Generally, the interior of the building, with exception of recently renovated areas, is showing signs of age. Although well kept and in good condition for its age, the carpet, ceiling tiles and mill work should each be refreshed. In any renovation project, these systems should be upgraded, however a phased prioritized systematic approach to their upgrade should also be planned to allow for a continuous refreshing of the building. Similarly, systematic painting of the non-wood surfaces should be considered, especially in high traffic areas.

There are several areas where door hardware should be replaced and upgraded to present code requirements to allow better building egress. This condition exists primarily in the exterior doors (which would be addressed during the envelope walk).

In the auditorium area, there are ADA slope issues that should be addressed in order to allow for a more accessible building.

Mechanically, the building is sound and, again, well maintained. There is not evidence of significant leakage or poorly maintained equipment and there are many pieces of equipment that are in good appearance for their age. There are, however quite a few multizone air handling units that are beyond their normal service life and should be scheduled for replacement. The replacement systems should be more efficient air-side systems to allow for indoor air quality measurement and meet present and upcoming ventilation standards while providing variable volume efficiency for a reduced motor and heat/cool energy footprint. These conditions occur in several wings of the building.

The second predominant issue with the mechanical systems are heat exchangers and pumps. There are several hydronic pumps that are beyond service life and in need of replacement. Similarly, there are non-redundant heat exchangers that should be considered for systematic replacement to avoid a loss of heat in various areas of the building. Because of the multizone/reheat nature of the building, loss of these systems will result in pockets or wings of the building with discomfort in the event of a failure.

The cooling towers in the power plant are beyond their normal service life and should be considered for systematic replacement or rebuilding with pan, fill and control replacement.

The boilers are at the end of normal service life, however with routine 20 year maintenance, they can continue life serving the building. Because of their life, however one new boiler should be considered to increase the system reliability. Many of the supporting equipment components have been replaced. There are, however, out in the wings of the building, steam-condensate units that are beyond normal service life and should receive pump replacement or entire unit replacement. There is evidence of a systematic approach to the replacement of these, found by several wings having new or relatively new equipment.

The terminal heating equipment (cabinet heaters and unit ventilators) are generally original throughout the areas they serve and should be systematically replaced in order to avoid a high maintenance requirement in the future. Most of this equipment is 25-50+ years old.

The plumbing fixtures in the building are mostly original. Although water saving fixtures are generally not recommended in existing systems of this age due to poor flow conditions in the sanitary piping, touch free technology can be introduced in order to provide more reliable and regular flushing while maintaining sanitary conditions.

Electrically, the buildings are in generally very good condition. Although some equipment is beyond normal service life it is well maintained and functioning well.

The lighting in the buildings are mostly fluorescent, however there are pockets of LED lighting throughout. Any future renovation should include replacement of fluorescent fixtures with LED. Lighting controls have been systematically replaced with occupancy and daylighting technology. Building emergency and egress lighting should be tested regularly, (power was not turned off during this study to test emergency fixtures). Parking Lot lighting has been converted to LED with some minor exceptions, including Hodgkin’s Drive, which is still utilizing H.I.D. fixtures.

Most of the panel boards in the building are original and generally beyond industry normal service life, however it is rare to replace electrical panels due to age, except where replacement parts cannot be obtained. There are, however several panels and load centers that are in

excess of 50 years old and are recommended to be replaced. In any renovation of a wing or large area that encompass an electrical panels area of service, the panel should be replaced to avoid less convenient replacement in the future at equipment failure. Where panels are replaced, the accompanying transformers, where applicable, should also be replaced.

There are areas where the electrical service area clearances have been violated at electrical panels and equipment. In particular, the original unit substations do not meet current code requirements for rear egress.

Electrical equipment, including substations and panel boards, in the pool equipment room, P020, are showing signs of external corrosion due to the room's chlorinated atmospheric condition. Methods of remediation should be considered.

Underground conduit in A-Wing are also showing signs of corrosion and consideration should be given to remedy this.

A systematic fire alarm replacement and upgrade should be considered due to the age of the system and changing code requirements for sound levels and synchronization. Currently, replacement heat detectors are not available.

Delta College Facilities Condition Assessment

DSD Project No. 20-0501.00

Delta College Main Campus
Building Area: 899,682 SF
No. of Floors: 3
Year Built: 1961
Year Renovated: Various -- see A001, A002 and A003
Evaluated: First Quarter 2020

Condition	
State	Condition Description
Good	Within the first half of its life and in good condition - no reported issues or concerns and no repairs needed
Fair	In the second half of its life. Minor repairs needed or higher than routine maintenance required
Poor	Beyond normal service life AND extremely worn, damaged or not functional requiring high maintenance and repairs

Deficiency Priorities	
Priority 1	**Current Critical:** Safety hazard, accelerated detrioration, potential life safety
Priority 2	**Potential Critical:** Problem Avoidance
Priority 3	**Necessary - Not Yet Critical:** Predictable deterioration
Priority 4	**Recommended:** Sensible or program oriented
Priority 5	**Grandfathered or no immediate action required**

Area (Floor/Wing)	Tag	Item/Description	Location	Condition			Approx year installed	Industry Standard Life	Est. Remaining ServiceLife (as of 2020)	Remarks	Qty	Unit	Deficiency Priorities					Deficiency Category
				Good	Fair	Poor							Priority 1	Priority 2	Priority 3	Priority 4	Priority 5

Delta College Facilities Condition Assessment

DSD Project No. 20-0501.00

Delta College Main Campus
Building Area: 899,682 SF
No. of Floors: 3
Year Built: 1961
Year Renovated: Various -- see A001, A002 and A003
Evaluated: First Quarter 2020

Condition	
State	Condition Description
Good	Within the first half of its life and in good condition - no reported issues or concerns and no repairs needed
Fair	In the second half of its life. Minor repairs needed or higher than routine maintenance required
Poor	Beyond normal service life AND extremely worn, damaged or not functional requiring high maintenance and repairs

Deficiency Priorities	
Priority 1	**Current Critical:** Safety hazard, accelerated detrioration, potential life safety
Priority 2	**Potential Critical:** Problem Avoidance
Priority 3	**Necessary - Not Yet Critical:** Predictable deterioration
Priority 4	**Recommended:** Sensible or program oriented
Priority 5	**Grandfathered or no immediate action required**

Delta College Facilities Condition Assessment

DSD Project No. 20-0501.00

Delta College Main Campus
Building Area: 899,682 SF
No. of Floors: 3
Year Built: 1961
Year Renovated: Various -- see A001, A002 and A003
Evaluated: First Quarter 2020

Condition	
State	Condition Description
Good	Within the first half of its life and in good condition - no reported issues or concerns and no repairs needed
Fair	In the second half of its life. Minor repairs needed or higher than routine maintenance required
Poor	Beyond normal service life AND extremely worn, damaged or not functional requiring high maintenance and repairs

Deficiency Priorities	
Priority 1	**Current Critical:** Safety hazard, accelerated detrioration, potential life safety
Priority 2	**Potential Critical:** Problem Avoidance
Priority 3	**Necessary - Not Yet Critical:** Predictable deterioration
Priority 4	**Recommended:** Sensible or program oriented
Priority 5	**Grandfathered or no immediate action required**

Delta College Facilities Condition Assessment

DSD Project No. 20-0501.00

Delta College Main Campus
Building Area: 899,682 SF
No. of Floors: 3
Year Built: 1961
Year Renovated: Various -- see A001, A002 and A003
Evaluated: First Quarter 2020

Condition	
State	Condition Description
Good	Within the first half of its life and in good condition - no reported issues or concerns and no repairs needed
Fair	In the second half of its life. Minor repairs needed or higher than routine maintenance required
Poor	Beyond normal service life AND extremely worn, damaged or not functional requiring high maintenance and repairs

Deficiency Priorities	
Priority 1	**Current Critical:** Safety hazard, accelerated detrioration, potential life safety
Priority 2	**Potential Critical:** Problem Avoidance
Priority 3	**Necessary - Not Yet Critical:** Predictable deterioration
Priority 4	**Recommended:** Sensible or program oriented
Priority 5	**Grandfathered or no immediate action required**

Delta College Facilities Condition Assessment

DSD Project No. 20-0501.00

Delta College Main Campus
Building Area: 899,682 SF
No. of Floors: 3
Year Built: 1961
Year Renovated: Various -- see A001, A002 and A003
Evaluated: First Quarter 2020

Condition	
State	Condition Description
Good	Within the first half of its life and in good condition - no reported issues or concerns and no repairs needed
Fair	In the second half of its life. Minor repairs needed or higher than routine maintenance required
Poor	Beyond normal service life AND extremely worn, damaged or not functional requiring high maintenance and repairs

Deficiency Priorities	
Priority 1	**Current Critical:** Safety hazard, accelerated detrioration, potential life safety
Priority 2	**Potential Critical:** Problem Avoidance
Priority 3	**Necessary - Not Yet Critical:** Predictable deterioration
Priority 4	**Recommended:** Sensible or program oriented
Priority 5	**Grandfathered or no immediate action required**

Area (Floor/Wing)	Tag	Item/Description	Location	Condition			Approx year installed	Industry Standard Life	Est. Remaining ServiceLife (as of 2020)	Remarks	Qty	Unit	Deficiency Priorities					Deficiency Category

Lower Level/ F-Wing	ERU-1	Energy Recovery Ventilator - Provides OA and EA to AHU-23 and AHU-24	FT01	X			2013	20 Years	13 Years	ReniewAire. 460V, 3 Ph.	1	Ea.					x	
Lower Level/ P-Wing	AHU-25	Air Handling Unit - Serves P-Wing 2nd Floor Raquetball Court	P020	x			2003	25 Years	8 Years	Trane. Climate Changer. Variable Volume, 28,000 CFM, 1050 GPM Steam Heating, 236 GPM (89 Tons) Chilled Water Cooling. Design data taken from documents provided by College. (w/ disconnect and VFD). Pipes showing corrosion entering unit.	1	Ea.				x		
Lower Level/ P-Wing	AHU-26	Air Handling Unit - Serves P-Wing 2nd Floor	P020	x			2003	25 Years	8 Years	Trane. Climate Changer. Variable Volume, 32,000 CFM, 1200 GPM Steam Heating, 272 GPM (103 Tons) Chilled Water Cooling. Design data taken from documents provided by College. (w/ two VFD's).	1	Ea.				x		
Lower Level/ P-Wing	AHU-27	Air Handling Unit - Serves P-Wing Pool	P020			X	2003	25 Years	8 Years	Des Chmaps. Constant Volume, 30,000 CFM, Hot Water Heating, 18-GPM (75 Tons) Chilled Water Cooling. 460V, 3 Ph. Design data taken from documents provided by College. (w/ disconnect and VFD). Drain pan leaking all over floor. Per College dampers also need to be replaced.	1	Ea.		x				
Lower Level/ P-Wing	AHU-28	Air Handling Unit - Serves P-Wing Lower Level and First Floor	P020	x			2003	25 Years	8 Years	Trane Climate Changer. Variable Volume, 50,000 CFM, 1870 MBH Steam Heating, 428 MBH (165 Tons) Chilled Water Cooling. Design data taken from documents provided by College. (w/ disconnect and VFD).	1	Ea.				x		
Lower Level/ A-Wing	HV-13	Air Handling Unit - Serves Main Hallway, Southwest Corridor, and North half of S-Wing Connector	AT01			X	1960	20 Years	-40 Years	Trane. Multizone. 6,600 CFM. 415 MBH Steam Heating, 50 GPM Chilled Water Cooling. Cooling. Design data taken from documents provided by the College. On at time of survey. (w/ disconnect). Unit rattling at time of survey.	1	Ea.		x				
Lower Level/ A-Wing	RF-13	Return Fan - Serves AHU-13	AT01			X	Assume 1960	20 Years	-40 Years	Trane Centrifugal Fan. Marathon Motor 3/2 HP, 208/230-460V, 3 Ph. (w/ disconnect)	1	Ea.		x				
Lower Level/ A-Wing	HV-14 (aka AHU-5)	Air Handlng Unit - Serves B-Wing East Offices and Registration Area	AT01			X	1998	20 Years	-2 Years	Trane. Variable Volume. 12,500 CFM. 677.8 MBH Steam Heating, 50 GPM Chilled Water Cooling. Design data taken from documents provided by the College. (W/ disconnect)	1	Ea.		x				
Lower Level/ A-Wing	RF-14 (aka RF-5)	Return Fan - Serves AHU-14	AT01			X	1998	20 Years	-2 Years		1	Ea.		x				
Lower Level/ A-Wing	AHU-15	Air Handling Unit - Serves DT Offices	AT01		X		2010	25 Years	15 Years	Trane Climate Changer. Variable Volume. 8,900 CFM, 326.5 MBH Steam Heating, 69.1 GPM (29.1 Tons) Chilled Water Cooling. 10 HP. 208V. 3 Ph. Design data taken from documents provided by the College. On at time of survey. (w/ disconnect)	1	Ea.				x		
Lower Level/ A-Wing	RF-15	Return Fan - Serves AHU-15	AT01		X		2010	20 Years	10 Years	Trane Climate Changer. 8900 CFM, 5 HP. 208V, 3 Ph. Design data taken from documents provided by the College.	1	Ea.				x		
Lower Level/ A-Wing	AHU-16	Air Handling Unit - Serves DTV Radio and Studios	AT01		X		2010	25 Years	15 Years	Trane Climate Changer. Variable Volume. 10,800 CFM, 420.5 MBH Steam Heating, 90.1 GPM (38 Tons) Chilled Water Cooling. 15 HP, 208V. 3 Ph. Design data taken from documents provided by the College. On at time of survey. (w/ disconnect)	1	Ea.				x		

Delta College Facilities Condition Assessment

DSD Project No. 20-0501.00

Delta College Main Campus
Building Area: 899,682 SF
No. of Floors: 3
Year Built: 1961
Year Renovated: Various -- see A001, A002 and A003
Evaluated: First Quarter 2020

Condition	
State	**Condition Description**
Good	Within the first half of its life and in good condition - no reported issues or concerns and no repairs needed
Fair	In the second half of its life. Minor repairs needed or higher than routine maintenance required
Poor	Beyond normal service life AND extremely worn, damaged or not functional requiring high maintenance and repairs

Deficiency Priorities	
Priority 1	**Current Critical:** Safety hazard, accelerated detrioration, potential life safety
Priority 2	**Potential Critical:** Problem Avoidance
Priority 3	**Necessary - Not Yet Critical:** Predictable deterioration
Priority 4	**Recommended:** Sensible or program oriented
Priority 5	**Grandfathered or no immediate action required**

Area (Floor/Wing)	Tag	Item/Description	Location	Condition			Approx year installed	Industry Standard Life	Est. Remaining ServiceLife (as of 2020)	Remarks	Qty	Unit	Deficiency Priorities					Deficiency Category
				Good	Fair	Poor							Priority 1	Priority 2	Priority 3	Priority 4	Priority 5	
Lower Level/ A-Wing	RF-16	Return Fan - Serves AHU-16	AT01		X		2010	20 Years	10 Years	Trane Climate Changer. 10,800 CFM, 7.5 HP. 208V, 3 Ph. Design data taken from documents provided by the College.	1	Ea.				x		
Second Floor/ A-Wing	AHU-5	Air Handlilng Unit - Serves A-Wing Second Floor Classrooms	A221			X	1998	25 Years	3 Years	Trane modular unit. Variable Volume. 20,000 CFM, 1084.5 MBH Steam Heating, 174.32 GPM Chilled Water Cooling. 460V, 3 Ph. Design data taken from documents provided by College. On at time of survey. (w/ VFD)	1	Ea.			x			
Second Floor/ A-Wing	RF-5	Return Fan - Serves AHU-5	A221			X	1998	20 Years	-2 Years	Inaccessable behind AHU-5 and RF-5	1	Ea.			x			
Second Floor/ A-Wing	AHU-6	Air Handlilng Unit - Serves G-Wing Lecture Theatre	A221	X			2017	25 Years	22 Years	Trane Climate Changer. Variable Volume. 13,000 CFM, 423 MBH hot water heating, 63.5 GPM Chilled Water Cooling. 208V 3 Ph. Design data taken from documents provided by College. (w/ disconnect and VFD)	1	Ea.					x	
Second Floor/ A-Wing	RF-6	Return Fan - Serves AHU-6	A221	X			2017	20 Years	17 Years	Trane Climate Changer. Variable Volume, 13,000 CFM (1) 8.0 HP, 208V, 3 Ph. (w/ disconnect and VFD)	1	Ea.					x	
Lower Level/ A-wing	HV-31 (aka AHU-8)	Air Handling Unit - Serves A-Wing Library East	AT07			X	1998	20 Years	-2 Years	Trane modular unit. Variable Volume. 39,000 CFM, 2114.8 MBH Steam Heating, 339.15 GPM Chilled Water Cooling. 460V. 3Ph. Design data taken from documents provided by College. On at time of survey. (w/ VFD)	1	Ea.			x			
Lower Level/ A-wing	RF-31 (aka RF-8)	Return Fan - Serves HV-31	AT07			X	1998	20 Years	-2 Years	Greenheck (w/ VFD and disconnect). Return fan very noisy.	1	Ea.			x			
Lower Level/ A-wing	HV-32 (aka AHU-7)	Air Handling Unit - Serves A-Wing Library West	AT05			X	1998	20 Years	-2 Years	Trane modular unit. Variable Volume. 39,000 CFM, 2114.8 MBH Steam Heating, 339.15 GPM Chilled Water Cooling. 460V, 3 Ph. Design data taken from documents provided by College. On at time of survey. (w/ VFD)	1	Ea.			x			
Lower Level/ A-wing	RF-32 (aka RF-7)	Return Fan - Serves HV-32	AT05			X	1998	20 Years	-2 Years	Greenheck (w/ VFD and disconnect). Return fan humming at time of survey.	1	Ea.			x			
Lower Level/ A-Wing	LB-1 (aka AHU 47)	Cooling Unit #1 - Serves DTV Area	AT08		X		2002	20 Years	2 Years	Liebert. 4,750 CFM. 25 GPM cooling. No heating. Tagged filters and belts replaced 2/2020. Trane Controls. On at time of survey.	1	Ea.				x		
Lower Level/ A-Wing	LB-2 (aka AHU 48)	Cooling Unit #2 - Serves DTV Area	AT08		X		2002	20 Years	2 Years	Liebert. 4,750 CFM. 25 GPM cooling. No heating. Tagged filters and belts replaced 2/2020. Trane Controls. On at time of survey.	1	Ea.				x		
Lower Level/ A-Wing	LB-3 (aka AHU 49)	Cooling Unit #3 - Serves DTV Area	AT08		X		2002	20 Years	2 Years	Liebert. 4,750 CFM. 25 GPM cooling. No heating. Tagged filters and belts replaced 2/2020. Trane Controls.	1	Ea.				x		
Lower Level/ A-Wing	AHU-46	Coling Unit - Serves IDF Room	AT03		X		2002	20 Years	2 Years	Trane. 800 CFM, 5.1 GPM Chilled Water Cooling. No heating.	1	Ea.				x		
Lower Level/ D-wing	AH-33	Air Handling Unit - Serves D-Wing West	DT01		X		1998	25 Years	3 Years	Trane modular unit. Variable Volume. 10,000 CFM, 542.2 MBH Steam Heating, 85.75 GPM Chilled Water Cooling. 460V, 3 Ph. Design data taken from documents provided by College. On at time of survey. (w/ VFD)	1	Ea.				x		
Lower Level/ D-wing	RF-33	Return Fan - Serves AH-33	DT01		X		1998	20 Years	-2 Years	Greenheck (w/ VFD and disconnect). Off at time of survey, but AH-33 on at time of survey.	1	Ea.				x		
Lower Level/ D-wing	AH-34	Air Handling Unit - Serves E-Wing Offices and Classrooms	DT01		X		1998	25 Years	3 Years	Trane modular unit. Variable Volume. 28,000 CFM, 1518.3 MBH Steam Heating, 242 GPM Chilled Water Cooling. 460V, 3 Ph. Design data taken from documents provided by College. On at time of survey. (w/ VFD)	1	Ea.				x		
Lower Level/ D-wing	RF-34	Return Fan - Serves AH-34	DT01			X	1998	20 Years	-2 Years	Greenheck (w/ VFD and disconnect). Very loud at time of survey.	1	Ea.			x			
Lower Level/ D-wing	AH-35	Air Handling Unit - Serves C-Wing	DT01		X		1998	25 Years	3 Years	Trane modular unit. Variable Volume. 28,000 CFM, 1518.3 MBH Steam Heating, 242 GPM Chilled Water Cooling. 460V, 3 Ph. Design data taken from documents provided by College. On at time of survey. (w/ VFD)	1	Ea.				x		
Lower Level/ D-wing	RF-35	Return Fan - Serves AH-35	DT01		X		1998	20 Years	-2 Years	Greenheck (w/ VFD and disconnect). On at time of survey.	1	Ea.				x		
Lower Level/ D-wing	MAU-36 (aka AH-36)	Air Handling Unit - Serves C-Wing and D-Wing West Sience Labs	DT01		X		1998	20 Years	-2 Years	Trane. Variable Volume Make Up Air. 40,000 CFM, 4028 MBH Steam Heating, 525.75 GPM Chilled Water Cooling. Design data taken from documents provided by College. On at time of survey. (w/ VFD). Piping entering front side of unit almost inaccessible. Ductowrk would need to be reconfigured when replaced.	1	Ea.				x

Area (Floor/Wing)	Tag	Item/Description	Location	Condition			Approx year installed	Industry Standard Life	Est. Remaining ServiceLife (as of 2020)	Remarks	Qty	Unit	Deficiency Priorities					Deficiency Category
				Good	Fair	Poor							Priority 1	Priority 2	Priority 3	Priority 4	Priority 5	
Second Floor/ D-wing	AH-20	Air Handling Unit - Serves D-Wing Administration	D201		X		1998	20 Years	-2 Years	Trane modular unit. Constant Volume. 14,500 CFM, 786.3 MBH Steam Heating, 125.47 GPM Chilled Water Cooling. Cooling. Design data taken from documents provided by College. On at time of survey.	1	Ea.				x		
Second Floor/ D-wing	RF-20	Return Fan - Serves AHU-20	D201		X		1998	20 Years	-2 Years	Greenheck. Noisy at time of survey.	1	Ea.				x		
Lower Level/ L-Wing	AHU-45	Air Handling Unit - Serves Kitchen	LT01		X		2003	25 Years	8 Years	Trane Climate Changer. Variable Volume. 28,450 CFM, 2453 MBH Steam Heating, 5.1 GPM Chilled Water Cooling. 200V, 3 Ph. Design datat taken from documents provided by College. On at time of survey (w/ VFD and disconnect).	1	Ea.				x		
Lower Level/ H-Wing	AH-50	Air Handling Unit - Serves UPS Room East Tunnel	HT01		X		2002	25 Years	7 Years	Trane. Fan Coil Unit. 1,600 CFM, 9 GPM, no heating, Chilled Water Cooling only. 208V., 3 Ph. Design data taken from documents provided by the College. On at time of survey and squeaking.	1	Ea.				x		
Second Floor/ G-Wing	AHU-21	Air Handlilng Unit - Serves G-wing First and Second Floors	G229	X			2017	25 Years	22 Years	Trane Climate Changer. Variable Volume. 10,000 CFM, 325.4 MBH, 24 GPM Hot Water Heating, 308 MBH, 48.7 GPM Chilled Water Cooling. (1) 10 HP, 208V, 3 Ph. Design data taken from documents provided by College. On at time of survey (w/ VFD and disconnect).	1	Ea.					x	
Second Floor/ G-Wing	RF-21	Return Fan - Serves RF-21	G229	X			2017	20 Years	17 Years	Trane Climate Changer. Variable Volume, 10,000 CFM (2) 2.5 HP, 208V, 3 Ph. (w/ disconnect and VFD)	1	Ea.					x	
Upper Level/ Z-Wing	AHU-Z	Air Handling Unit	Z111			X	Unknown	25 Years		Appears to be abandoned, pressure gauges read 0, but oil gauges reading higher. Open.	1	Ea.		x				
Grade Level/ M-Wing	HV-29	Air Handling Unit - Serves M-Wing West	M105 (M106)			X	1991	20 Years	9 Years	Trane. Variable Volume. 12,400 CFM, No heating, 100 GPM Chilled Water. 10 HP, 460V, 3 Ph. (w/ diconnect)	1	Ea.		x				
Grade Level/ M-Wing	RF-29	Return Fan - Serves HV-29	M105 (M106)			X	1991	20 Years	9 Years	Inline. (w/ disconnect)	1	Ea.		x				
Second Floor/ M-Wing	MAU-38	Make Up Air Unit - Serves M-Wing North Auto Lab	M201		X		2003	25 Years	8 Years	Trane Climate Changer. Makeup Air Heat Recovery, 12,100 CMF, 1024 MBH Steam Heating, 140 GPM Chilled Water Cooling. Design data taken from documents provided by college. (w/ VFD and disconnect). Steam pipes squeling at time of survey.	1	Ea.				x		
Second Floor/ M-Wing	AHU-39	Air Handling Unit - Serves L-Wing Process Controls	M201		X		2003	25 Years	8 Years	Trane Climate Changer. Constant Volume Reheat, 7,050 CFM. 252 MBH Steam Heating, 44.5 GPM Chilled Water Cooling. Design data taken from documents provided by college. (w/ 2 disconnect)	1	Ea.				x		
Second Floor/ M-Wing	AHU-40	Air Handling Unit - Serves M-Wing South Auto Lab	M201		X		2003	25 Years	8 Years	Trane Climate Changer. Makeup Air Heat Recovery, 14,100 CFM. 1193 MBH Steam Heating, 157 GPM Chilled Water Cooling. Design data taken from documents provided by college. (w/ VFD and disconnect)	1	Ea.				x		
Second Floor/ M-Wing	AHU-41	Air Handling Unit - Serves L-Wing	M201		X		2003	25 Years	8 Years	Trane Climate Changer. Variable Volumne. 13,500 CFM. 483 MBH Steam Heating, 106 GPM Chilled Water Cooling. Design data taken from documents provided by college. (w/ 2 VFD's and disconnects)	1	Ea.				x		
Second Floor/ M-Wing	MAU-42	Make Up Air Unit - Serves L-Wing Welding	M201		X		2003	25 Years	8 Years	Trane Climate Changer. Makeup Air with VFD, 16,500 CFM. 1074 MBH Steam Heating, 189 GPM Chilled Water Cooling. Design data taken from documents provided by college. (w/ VFD and disconnect)	1	Ea.				x		
Second Floor/ M-Wing	AHU-43	Air Handling Unit - Serves M-Wing Construction Lab	M201		X		2003	25 Years	8 Years	Trane Climate Changer. Variable Volumne. 11,000 CFM. 399 MBH Steam Heating, 76.5 GPM Chilled Water Cooling. Design data taken from documents provided by college. (w/ 2 VFD's and disconnects)	1	Ea.				x		
Second Floor/ M-Wing	AHU-44	Air Handling Unit - Serves M-Wing Office, RAH/HVAC Lab, Hall/Classroom	M201		X		2003	25 Years	8 Years	Trane. Variable Volumne. 14,000 CFM. 501 MBH Steam Heating, 110 GPM Chilled Water Cooling. Design data taken from documents provided by college. (w/ 2 VFD's and disconnects)	1	Ea.				x

Delta College Facilities Condition Assessment

DSD Project No. 20-0501.00

Delta College Main Campus
Building Area: 899,682 SF
No. of Floors: 3
Year Built: 1961
Year Renovated: Various -- see A001, A002 and A003
Evaluated: First Quarter 2020

Condition	
State	**Condition Description**
Good	Within the first half of its life and in good condition - no reported issues or concerns and no repairs needed
Fair	In the second half of its life. Minor repairs needed or higher than routine maintenance required
Poor	Beyond normal service life AND extremely worn, damaged or not functional requiring high maintenance and repairs

Deficiency Priorities	
Priority 1	**Current Critical:** Safety hazard, accelerated detrioration, potential life safety
Priority 2	**Potential Critical:** Problem Avoidance
Priority 3	**Necessary - Not Yet Critical:** Predictable deterioration
Priority 4	**Recommended:** Sensible or program oriented
Priority 5	**Grandfathered or no immediate action required**

Area (Floor/Wing)	Tag	Item/Description	Location	Condition			Approx year installed	Industry Standard Life	Est. Remaining ServiceLife (as of 2020)	Remarks	Qty	Unit	Deficiency Priorities					Deficiency Category

Lower Level/ Z-Wing	DA-BFP	Dearator and 3 Boiler Feed pumps (skid)	ZT01		X		1996	15 Years	-9 Years	Insulation peeling on system. (w/ control panel)	1	Ea.			x			
		- Dearator Tank		X			2008	30 Years	18 Years	130 c.f. (960 gal.) storage tank.	1	Ea.					x	
		- Pumps (P-1, P-2, P-3)		X			2008	15 Years	3 Years	Vertical Inline. In accessable to aquire information on pumps.	3	Ea.				x		
		- Dome			X		1996	30 Years	4 Years	47,732 #/hr Design data taken from documents provided by the College.	1	Ea.				x		
Lower Level/ Z-Wing	ST	Surge Tank	ZT01		X		1996	30 Years	6 Years	1290 Gal. Design data taken from documents provided by the College.	1	Ea.				x		
Lower Level/ Z-Wing	CTP-1	Condesate Transfer Base Mounted Pump	ZT01		X			20 Years		5 HP, 230/460V. 3 Ph.	1	Ea.			x			
Lower Level/ Z-Wing	CTP-2	Condesate Transfer Base Mounted Pump	ZT01		X			20 Years		5 HP, 230/460V. 3 Ph.	1	Ea.			x			
Lower Level/ Z-Wing	UH-1	Steam Unit Heater - Serves Boiler Area	ZT01		X		Assume 1996	20 Years	-4 Years	Up high. Inaccessable. Trane, 208#/hr. Design data taken from documents provided by the College.	1	Ea.			x			
Lower Level/ Z-Wing	UH-2	Steam Unit Heater - Serves Boiler Area	ZT01		X		Assume 1996	20 Years	-4 Years	Up high. Inaccessable. Trane, 208#/hr. Design data taken from documents provided by the College.	1	Ea.			x			
Lower Level/ Z-Wing	CRU-Z	Condensate return tank and 3 pumps (system)	ZT01		X		Assume 1996	20 Years	-4 Years	Shipco. 30 GPM, 1/2 Hp. 460V, 3 Ph.Design data taken from documents provided by the College.	1	Ea.			x			
Lower Level/ Z-Wing	ET-Z	Expansion Tank	ZT01		X			30 Years		Bell and Gossett.	1	Ea.			x			
Lower Level/ Z-Wing	BWCT	Boiler Water Chemical Treatment System	ZT01					30 Years			1	Ea.			x			
		- Treatment Tanks			X		Assume 1996	30 Years	6 Years	Stainless Steel Storage tanks	2	Ea.				x		
		- Pumps			X		Assume 1996	20 Years	-4 Years	4 base mounted pumps. Tags not eaily accessable. Beilived to all be approx. 1.5 HP, 115/208-230V, 1 Ph.	4	Ea.				x		
		- Water Softener Tanks			X		Unknown	30 Years			2	Ea.				x		
		- Brine Tank			X		Unknown	30 Years			1	Ea.				x		
Z-Wing		Oil Storage	Exterior to Wing		X		Assume 1996			Per College - Never been used	1	Ea.					x	
Lower Level/ Z-Wing	FOP	Fuel Oil Pumps	ZT01		X		Assume 1996	20 Years	-4 Years	Per College - Never been used	3	Ea.					x	
Lower Level/ C-Wing	CRU-7	Condensate return tank and 2 pumps (system)	CT01		X		Assume 2005	20 Years	5 Years	Bell and Gossett. 12 GPM, 208V, 3 Ph. Making bubbling noises.	1	Ea.					x	
Lower Level/ C-Wing	HX-C	Heat Exchanger	CT01		X		Assume 2005	20 Years	5 Years	Bell and Gossett.	1	Ea.					x	
Lower Level/ C-Wing	ET-C	Expansion Tank	CT01		X		Assume 2005	30 Years	15 Years	Stickered with '2005'	1	Ea.					x	
Lower Level/ C-Wing	AS-C	Air Seperator	CT01		X		Assume 2005	30 Years	15 Years		1	Ea.					x	
Lower Level/ C-Wing	HHWP-1C (aka CP-1)	Heating Hot Water Base Mounted Pump	CT01		X		Assume 2005	20 Years	5 Years	R.L. Deppman. 140 GPM, 40 ft. Head, 3 HP. 230/460V, 3 Ph. (w/ disconnect and VFD)	1	Ea.					x	
Lower Level/ C-Wing	HHWP-2C (aka CP-2)	Heating Hot Water Base Mounted Pump	CT01		X		Assume 2005	20 Years	5 Years	R.L. Deppman. 140 GPM, 40 ft. Head, 3 HP. 230/460V, 3 Ph. (w/ disconnect and VFD)	1	Ea.					x	

Delta College Facilities Condition Assessment

DSD Project No. 20-0501.00

Delta College Main Campus
Building Area: 899,682 SF
No. of Floors: 3
Year Built: 1961
Year Renovated: Various -- see A001, A002 and A003
Evaluated: First Quarter 2020

Condition	
State	**Condition Description**
Good	Within the first half of its life and in good condition - no reported issues or concerns and no repairs needed
Fair	In the second half of its life. Minor repairs needed or higher than routine maintenance required
Poor	Beyond normal service life AND extremely worn, damaged or not functional requiring high maintenance and repairs

Deficiency Priorities	
Priority 1	**Current Critical:** Safety hazard, accelerated detrioration, potential life safety
Priority 2	**Potential Critical:** Problem Avoidance
Priority 3	**Necessary - Not Yet Critical:** Predictable deterioration
Priority 4	**Recommended:** Sensible or program oriented
Priority 5	**Grandfathered or no immediate action required**

Area (Floor/Wing)	Tag	Item/Description	Location	Condition			Approx year installed	Industry Standard Life	Est. Remaining ServiceLife (as of 2020)	Remarks	Qty	Unit	Deficiency Priorities					Deficiency Category
				Good	Fair	Poor							Priority 1	Priority 2	Priority 3	Priority 4	Priority 5	
Lower Level/ D-Wing	HEX-ET	Heat Exhanger System (packaged system)	DT01							Stacked system on steel rails between air handlers. Would need to be replaced in similar configuration due to limitations on space. Steel showing signs of corrosion. System draining to floor through flex hose with rust on it (tripping hazard).								
		- Heat Exchanger	DT01			X		24 Years		May have leaked at one time. Items below HEX showing signs that HEX leaked on them. Insulation torn. Flanges corroding.	1	Ea.			x			
		- Expansion Tank	DT01			X		30 Years			1	Ea.			x			
		- Pumps	DT01			X		20 Years		Bell and Gossett. 125 GPM, 65 ft. Head, 5 HP. 230/460V. 3 Ph. Piping and flanges heavily corroded. (w/ VFD's)	2	Ea.			x			
		- Air Seperator	DT01			X		30 Years		Heavily corroded.	1	Ea.			x			
Lower Level/ D-Wing	CP-1/2	Condensate Pumps - Serves AHU's via trench drain in room and HEX via piping	DT01		X		Assume 2006	20 Years	6 Years	Bell and Gossett. 50 GPM, 1.5 HP, 208-230/460V. 3 Ph. From model # assume 2006.	2	Ea.				x		
Lower Level/ D-Wing	HX-1D	Heat Exchanger	DT01	X				24 Years			1	Ea.					x	
Lower Level/ D-Wing	GF-2D	Glycol Feed	DT01	X			Assume 2015	30 Years	15 Years	Califactio	1	Ea.					x	
Lower Level/ D-Wing	ET-1D	Expansion Tank	DT01	X			2015	30 Years	15 Years	Bell and Gossett, 53 gal.	1	Ea.					x	
Lower Level/ D-Wing	DT-1D	Drip Tank	DT01	X			Assume 2015	30 Years	25 Years	Plastic. Approx. 50 gal.	1	Ea.					x	
Lower Level/ D-Wing	AS-1D	Air Seperator	DT01	X			Assume 2015	30 Years	25 Years		1	Ea.					x	
Lower Level/ D-Wing	HHWP-1D (aka CP-1)	Heating Hot Water Base Mounted Pump	DT01	X			Assume 2015	20 Years	15 Years	Bell and Gossett. 200 GPM, 45 ft. Head, 5 HP. 208-230/460V, 3 Ph. Per serial number assume 2015.	1	Ea.					x	
Lower Level/ D-Wing	HHWP-2D (aka CP-2)	Heating Hot Water Base Mounted Pump	DT01	X			Assume 2015	20 Years	15 Years	Bell and Gossett. 200 GPM, 45 ft. Head, 5 HP. 208-230/460V, 3 Ph. Per serial number assume 2015.	1	Ea.					x	
Lower Level/ D-Wing	CF-1D	Chemical Feeder	DT01	X			Assume 2015	30 Years	25 Years		1	Ea.					x	
Lower Level/ F-Wing	AS-1F	Air Seperator - Serves HX-1F and HX-2F	FT01	X			2013	30 Years	23 Years		1	Ea.					x	
Lower Level/ F-Wing	AS-2F	Air Seperator - Serves HX-3F	FT01	X			2013	30 Years	23 Years		1	Ea.					x	
Lower Level/ F-Wing	ET-1F	Expansion Tank	FT01	X			2013	30 Years	23 Years	Armstrong 80 gal.	1	Ea.					x	
Lower Level/ F-Wing	ET-2F	Expansion Tank	FT01	X			2013	30 Years	23 Years	Armstrong 211 gal.	1	Ea.					x	
Lower Level/ F-Wing	CT-1F	Chemical Feeder	FT01	X			Assume 2013	30 Years	23 Years		1	Ea.					x	
Lower Level/ F-Wing	HHWP-1F (aka CP-1)	Heating Hot Water Base Mounted Pump	FT01	X			2013	20 Years	13 Years	Armstrong. 405 GPM, 80 ft Head. 15 HP, 208/230-460V, 3 Ph. (w/ VFD)	1	Ea.					x	
Lower Level/ F-Wing	HHWP-2F (aka CP-2)	Heating Hot Water Base Mounted Pump	FT01	X			2013	20 Years	13 Years	Armstrong. 405 GPM, 80 ft Head. 15 HP, 208/230-460V, 3 Ph. (w/ VFD)	1	Ea.					x	
Lower Level/ F-Wing	HHWP-3F (aka CP-3)	Heating Hot Water Circulating Pump	FT01	X			2013	20 Years	13 Years	Armstrong. 65 GPM, 75 ft. Head. 3 HP, 480V, 3 Ph. (w/ VFD). Design data taken from documents provided by College.	1	Ea.					x	
Lower Level/ F-Wing	HHWP-4F (aka CP-4)	Heating Hot Water Circulating Pump	FT01	X			2013	20 Years	13 Years	Armstrong. 65 GPM, 75 ft. Head. 3 HP, 480V, 3 Ph. (w/ VFD). Design data taken from documents provided by College.	1	Ea.					x	
Lower Level/ F-Wing	HX-1F	Heat Exchanger	FT01	X			2013	24 Years	17 Years	3889 MBH, 265 GPM. Design data taken from documents provided by College.	1	Ea.					x	
Lower Level/ F-Wing	HX-2F	Heat Exchanger	FT01	X			2013	24 Years	17 Years	3889 MBH, 265 GPM. Design data taken from documents provided by College.	1	Ea.					x	
Lower Level/ F-Wing	HX-3F	Heat Exchanger	FT01	X			2013	24 Years	17 Years	795 MBH, 65 GPM. Design data taken from documents provided by College.	1	Ea.					x	
Lower Level/ F-Wing	CRU-1F	Condensate return tank and 2 pumps (system)	FT01	X			2013	30 Years	23 Years	Each pump 22 GPM, 1.5 HP. 480V, 3 Ph. (W/ control panel). Design data taken from documents provided by College.	1	Ea.					x	
Lower Level/ S-Wing	CRU-S	Condensate return tank and 2 pumps (system)	ST01			X	Unknown	20 Years		40 GPM, 50 ft Head. 3 HP, 230/460V, 3 Ph. (with two disconnects). Water in the floor, appears to have leaks.	1	Ea.			x			
Lower Level/ S-Wing	HX-1	Heat exchanger and pump skid (aka HW Circ Pump #2 - West) - Serves S-Wing Perimeter Heating inlcuding Classroom UV's, CUH's, Perimeter Fin Tube	ST01			X	1967	24 Years	-21 Years	2200#/hr. System heavily corroded. Design data taken from documents provided by College.	1	Ea.		x				
Lower Level/ S-Wing	HX-2	Heat exchanger and pump skid (aka HW Circ Pump #1 - East) - Unknown serves	ST01			X	1967	24 Years	-21 Years	1425#/hr. System heavily corroded. Design data taken from documents provided by College.	1	Ea.		x

Delta College Facilities Condition Assessment

DSD Project No. 20-0501.00

Delta College Main Campus
Building Area: 899,682 SF
No. of Floors: 3
Year Built: 1961
Year Renovated: Various -- see A001, A002 and A003
Evaluated: First Quarter 2020

Condition	
State	**Condition Description**
Good	Within the first half of its life and in good condition - no reported issues or concerns and no repairs needed
Fair	in the second half of its life. Minor repairs needed or higher than routine maintenance required
Poor	Beyond normal service life AND extremely worn, damaged or not functional requiring high maintenance and repairs

Deficiency Priorities	
Priority 1	**Current Critical:** Safety hazard, accelerated detrioration, potential life safety
Priority 2	**Potential Critical:** Problem Avoidance
Priority 3	**Necessary - Not Yet Critical:** Predictable deterioration
Priority 4	**Recommended:** Sensible or program oriented
Priority 5	**Grandfathered or no immediate action required**

Area (Floor/Wing)	Tag	Item/Description	Location	Condition			Approx year installed	Industry Standard Life	Est. Remaining ServiceLife (as of 2020)	Remarks	Qty	Unit	Deficiency Priorities					Deficiency Category
				Good	Fair	Poor							Priority 1	Priority 2	Priority 3	Priority 4	Priority 5

Delta College Facilities Condition Assessment

DSD Project No. 20-0501.00

Delta College Main Campus
Building Area: 899,682 SF
No. of Floors: 3
Year Built: 1961
Year Renovated: Various -- see A001, A002 and A003
Evaluated: First Quarter 2020

Condition	
State	Condition Description
Good	Within the first half of its life and in good condition - no reported issues or concerns and no repairs needed
Fair	In the second half of its life. Minor repairs needed or higher than routine maintenance required
Poor	Beyond normal service life AND extremely worn, damaged or not functional requiring high maintenance and repairs

Deficiency Priorities	
Priority 1	**Current Critical:** Safety hazard, accelerated detrioration, potential life safety
Priority 2	**Potential Critical:** Problem Avoidance
Priority 3	**Necessary - Not Yet Critical:** Predictable deterioration
Priority 4	**Recommended:** Sensible or program oriented
Priority 5	**Grandfathered or no immediate action required**

Area (Floor/Wing)	Tag	Item/Description	Location	Condition			Approx year installed	Industry Standard Life	Est. Remaining ServiceLife (as of 2020)	Remarks	Qty	Unit	Deficiency Priorities					Deficiency Category
				Good	Fair	Poor							Priority 1	Priority 2	Priority 3	Priority 4	Priority 5	
K-Wing	DDC-1	Local control panels	For each AHU														x	
K-Wing	DDC-2	Local controllers	Each piece of equipment														x	
K-Wing	DDC-3	Local Controls	FCU's, Conv., and CUH's														x	
L-Wing	DDC-1	Local control panels	For each AHU														x

Delta College Facilities Condition Assessment

DSD Project No. 20-0501.00

Delta College Main Campus
Building Area: 899,682 SF
No. of Floors: 3
Year Built: 1961
Year Renovated: Various -- see A001, A002 and A003
Evaluated: First Quarter 2020

Condition	
State	**Condition Description**
Good	Within the first half of its life and in good condition - no reported issues or concerns and no repairs needed
Fair	In the second half of its life. Minor repairs needed or higher than routine maintenance required
Poor	Beyond normal service life AND extremely worn, damaged or not functional requiring high maintenance and repairs

Deficiency Priorities	
Priority 1	**Current Critical:** Safety hazard, accelerated detrioration, potential life safety
Priority 2	**Potential Critical:** Problem Avoidance
Priority 3	**Necessary - Not Yet Critical:** Predictable deterioration
Priority 4	**Recommended:** Sensible or program oriented
Priority 5	**Grandfathered or no immediate action required**

Delta College Facilities Condition Assessment

DSD Project No. 20-0501.00

Delta College Main Campus
Building Area: 899,682 SF
No. of Floors: 3
Year Built: 1961
Year Renovated: Various -- see A001, A002 and A003
Evaluated: First Quarter 2020

Condition	
State	Condition Description
Good	Within the first half of its life and in good condition - no reported issues or concerns and no repairs needed
Fair	In the second half of its life. Minor repairs needed or higher than routine maintenance required
Poor	Beyond normal service life AND extremely worn, damaged or not functional requiring high maintenance and repairs

Deficiency Priorities	
Priority 1	**Current Critical:** Safety hazard, accelerated detrioration, potential life safety
Priority 2	**Potential Critical:** Problem Avoidance
Priority 3	**Necessary - Not Yet Critical:** Predictable deterioration
Priority 4	**Recommended:** Sensible or program oriented
Priority 5	**Grandfathered or no immediate action required**

Delta College Facilities Condition Assessment

DSD Project No. 20-0501.00

Delta College Main Campus
Building Area: 899,682 SF
No. of Floors: 3
Year Built: 1961
Year Renovated: Various -- see A001, A002 and A003
Evaluated: First Quarter 2020

Condition	
State	Condition Description
Good	Within the first half of its life and in good condition - no reported issues or concerns and no repairs needed
Fair	In the second half of its life. Minor repairs needed or higher than routine maintenance required
Poor	Beyond normal service life AND extremely worn, damaged or not functional requiring high maintenance and repairs

Deficiency Priorities	
Priority 1	**Current Critical:** Safety hazard, accelerated detrioration, potential life safety
Priority 2	**Potential Critical:** Problem Avoidance
Priority 3	**Necessary - Not Yet Critical:** Predictable deterioration
Priority 4	**Recommended:** Sensible or program oriented
Priority 5	**Grandfathered or no immediate action required**

Area (Floor/Wing)	Tag	Item/Description	Location	Condition			Approx year installed	Industry Standard Life	Est. Remaining ServiceLife (as of 2020)	Remarks	Qty	Unit	Deficiency Priorities					Deficiency Category

Delta College Facilities Condition Assessment

DSD Project No. 20-0501.00

Delta College Main Campus
Building Area: 899,682 SF
No. of Floors: 3
Year Built: 1961
Year Renovated: Various -- see A001, A002 and A003
Evaluated: First Quarter 2020

Condition	
State	Condition Description
Good	Within the first half of its life and in good condition - no reported issues or concerns and no repairs needed
Fair	In the second half of its life. Minor repairs needed or higher than routine maintenance required
Poor	Beyond normal service life AND extremely worn, damaged or not functional requiring high maintenance and repairs

Deficiency Priorities	
Priority 1	**Current Critical:** Safety hazard, accelerated detrioration, potential life safety
Priority 2	**Potential Critical:** Problem Avoidance
Priority 3	**Necessary - Not Yet Critical:** Predictable deterioration
Priority 4	**Recommended:** Sensible or program oriented
Priority 5	**Grandfathered or no immediate action required**

Area (Floor/Wing)	Tag	Item/Description	Location	Condition			Approx year installed	Industry Standard Life	Est. Remaining ServiceLife (as of 2020)	Remarks	Qty	Unit	Deficiency Priorities					Deficiency Category

Delta College Facilities Condition Assessment

DSD Project No. 20-0501.00

Delta College Grounds Buildings
Building Area: Grounds Maintenance - 8,400 SF, Grounds Maintenance Storage Bldgs - 1,792, 4,224, 2,772 SF
No. of Floors: 1
Year Built: Grounds Maintenance - 1968, Grounds Maintenance Storage Bldgs - 1984, 2009, 2009
Year Renovated:
Evaluated: First Quarter 2020

Condition	
State	Condition Description
Good	Within the first half of its life and in good condition - no reported issues or concerns and no repairs needed
Fair	In the second half of its life. Minor repairs needed or higher than routine maintenance required
Poor	Beyond normal service life AND extremely worn, damaged or not functional requiring high maintenance and repairs

Deficiency Priorities	
Priority 1	**Current Critical:** Safety hazard, accelerated detrioration, potential life safety
Priority 2	**Potential Critical:** Problem Avoidance
Priority 3	**Necessary - Not Yet Critical:** Predictable deterioration
Priority 4	**Recommended:** Sensible or program oriented
Priority 5	**Grandfathered:** Outside of current code/standards

Area (Floor/Wing)	Tag	Item/Description	Location	Condition			Approx year installed	Industry Standard Life	Est. Remaining ServiceLife (as of 2020)	Remarks	Qty	Unit	Deficiency Priorities					Deficiency Category

Delta College Facilities Condition Assessment

DSD Project No. 20-0501.00

Delta College Farm
Building Area: House 9,064 SF, Barn 7,900 SF, Shed 1,020 SF, Tool Shed 1,320 SF, Pavilion 960 SF
No. of Floors: 1
Year Built: House 1870, Barn 1881, Shed 1890, Tool Shed 1930, Pavilion 1984
Year Renovated: House 1999, Garage Addition 2015
Evaluated: First Quarter 2020

Condition	
State	Condition Description
Good	Within the first half of its life and in good condition - no reported issues or concerns and no repairs needed
Fair	In the second half of its life. Minor repairs needed or higher than routine maintenance required
Poor	Beyond normal service life AND extremely worn, damaged or not functional requiring high maintenance and repairs

Deficiency Priorities	
Priority 1	**Current Critical:** Safety hazard, accelerated detrioration, potential life safety
Priority 2	**Potential Critical:** Problem Avoidance
Priority 3	**Necessary - Not Yet Critical:** Predictable deterioration
Priority 4	**Recommended:** Sensible or program oriented
Priority 5	**Grandfathered:** Outside of current code/standards

Delta College Planetarium & Science Center
Building Area: 39,204 SF
No. of Floors: 3
Year Built: 1996
Year Renovated: None
Evaluated: First Quarter 2020

Condition	
State	Condition Description
Good	Within the first half of its life and in good condition - no reported issues or concerns and no repairs needed
Fair	In the second half of its life. Minor repairs needed or higher than routine maintenance required
Poor	Beyond normal service life AND extremely worn, damaged or not functional requiring high maintenance and repairs

Deficiency Priorities	
Priority 1	**Current Critical:** Safety hazard, accelerated detrioration, potential life safety
Priority 2	**Potential Critical:** Problem Avoidance
Priority 3	**Necessary - Not Yet Critical:** Predictable deterioration
Priority 4	**Recommended:** Sensible or program oriented
Priority 5	**Grandfathered:** Outside of current code/standards

Area (Floor/Wing)	Tag	Item/Description	Location	Condition			Approx year installed	Industry Standard Life	Est. Remaining ServiceLife (as of 2020)	Remarks	Qty	Unit	Deficiency Priorities					Deficiency Category

		PIPING TEE UP
		PIPING TEE DOWN
		DIELECTRIC UNION OR FLANGE CONNECTION
		ISOLATION VALVE
		GATE VALVE
		CHECK VALVE
		BUTTERFLY VALVE
		SOLENOID VALVE
		BALL VALVE
		GLOBE VALVE
		LUBRICATED PLUG VALVE
		BALANCE VALVE
		CONTROL VALVE - 2 WAY
		CONTROL VALVE - 3 WAY
		BACKWATER VALVE
		STRAINER
		THERMOMETER
		PRESSURE GAUGE WITH BALL VALVE
		CIRCUIT SETTER
		FLOW METER
		PIPE EXPANSION LOOP
		PIPE ANCHOR
		PIPE GUIDE
		CONCRETE THRUST BLOCK
		FLOW ARROW
		FIRE DAMPER HORIZONTAL POSITION
		COMBINATION FIRE/SMOKE DAMPER HORIZONTAL POSITION
		FIRE DAMPER VERTICAL POSITION
		COMBINATION FIRE/SMOKE DAMPER VERTICAL POSITION
FS	FS	FIRE PROTECTION FLOW SWITCH
TS	TS	FIRE PROTECTION TAMPER SWITCH
M	M	MOTORIZED DEVICE
		SUPPLY AIR CEILING DIFFUSER
		RETURN AIR REGISTER OR GRILLE
		EXHAUST AIR REGISTER OR GRILLE
		FLEXIBLE DUCT
		SPIN-IN FITTING WITH VOLUME DAMPER (TO BOTTOM OF DUCT)
		SPIN-IN FITTING WITH VOLUME DAMPER (TO SIDE OF DUCT)
		CONCENTRIC REDUCER (PIPE OR DUCT)
		ECCENTRIC REDUCER (PIPE OR DUCT)
T	T	THERMOSTAT
H	H	HUMIDISTAT
S	S	TEMPERATURE CONTROL SENSOR

ABBREVIATIONS

SYMBOL	DESCRIPTION
A.A.V.	AUTOMATIC AIR VENT
ABV	ABOVE
A.F.F.	ABOVE FINISHED FLOOR
A.H.U.	AIR HANDLING UNIT
A.S.R.	AUTOMATIC SPRINKLER RISER
B.O.D.	BOTTOM OF DUCT
B.O.P.	BOTTOM OF PIPE
B.W.V.	BACK WATER VALVE
C.A.	COMPRESSED AIR
CHWP	CHILLED WATER PUMP
C.I.	CAST IRON
C.O.	CLEAN OUT
CONN.	CONNECTION
C.W.	COLD WATER
C.W.P.	CONDENSER WATER PUMP
C.V.	CONTROL VALVE
D.C.W.	DOMESTIC COLD WATER
DN	DOWN
D&T	DRIP AND TRAP
E.W.C.	ELECTRIC WATER COOLER
E.W.H.	ELECTRIC WATER HEATER
EXH.	EXHAUST
E.R.	EXHAUST REGISTER
F.D.	FLOOR DRAIN
FLR.	FLOOR
F.H.	FIRE HYDRANT
F.U.	FIXTURE UNITS (DRAINAGE)
G.D.	GARBAGE DISPOSAL
G.V.	GATE VALVE
GL.V.	GLOBE VALVE
H.B.	HOSE BIBB
H.C.	HOSE CABINET
H.W.	HOT WATER
HYD.	HYDRANT
H.O.	HUB OUTLET
I.E.	INVERT ELEVATION
LAV.	LAVATORY
M.B.H.	THOUSAND BTU/HR (BRITISH THERMAL UNITS PER HOUR)
M.H.	MANHOLE
N.I.C.	NOT IN CONTRACT
NK.	NECK
O.A.	OUTSIDE AIR
PCHWS	PRIMARY CHILLED WATER SUPPLY
PCHWR	PRIMARY CHILLED WATER RETURN
P.H.	PHYSICALLY HANDICAPPED
P.R.V.	PRESSURE REDUCING VALVE
P.T.	PLUGGED TEE
R.A.	RETURN AIR
R.A.F.	RETURN AIR FAN
R.C.	RAINWATER CONDUCTOR
R.C.(S)	RAINWATER CONDUCTOR SECONDARY

ABBREVIATIONS

SYMBOL	DESCRIPTION
R.S.	ROOF SUMP
S.A.	SUPPLY AIR
SAN	SANITARY PIPE
SCHWS	SECONDARY CHILLED WATER SUPPLY
SCHWR	SECONDARY CHILLED WATER RETURN
S.S.	SERVICE SINK
T.A.D.	TRANSFER AIR DUCT
T.D.C.	TILE DRAIN CONNECTION
TYP.	TYPICAL
UR.	URINAL
V	VENT
VAV	VARIABLE AIR VOLUME BOX
VAVR	VARIABLE AIR VOLUME BOX WITH HOT WATER REHEAT
VAVRE	VARIABLE AIR VOLUME BOX WITH ELECTRIC REHEAT
V.T.R.	VENT THROUGH ROOF
V.D.	VOLUME DAMPER
V.O.	VALVED OUTLET
W	WASTE
W.C.	WATER CLOSET
W.C.O.	WALL CLEAN OUT
W.H.	WALL HYDRANT

PIPING LEGEND

SYMBOL	DESCRIPTION
CD	CONDENSATE DRAIN (GRAVITY)
CHWR	CHILLED WATER RETURN
CHWS	CHILLED WATER SUPPLY
COMB	COMBINATION SEWER
CR	CONDENSATE RETURN
CWR	CONDENSER WATER RETURN
CWS	CONDENSER WATER SUPPLY
F	FIRE PROTECTION
NG	NATURAL GAS
HHWR	HEATING HOT WATER RETURN
HHWS	HEATING HOT WATER SUPPLY
HPC	HIGH PRESSURE CONDENSATE
HPS	HIGH PRESSURE STEAM
LPC	LOW PRESSURE CONDENSATE
LPS	LOW PRESSURE STEAM
O	OIL
PC	PUMPED CONDENSATE
SAN	SANITARY
ST	STORM
V	VENT
— —	COLD WATER
— – —	HOT WATER
— – – —	HOT WATER RECIRCULATING

SHEET TITLE
STEAM AND CONDENSATE BOILER ROOM SYSTEM SCHEMATIC DIAGRAM

SHEET NUMBER
M-605

XREF: 20-0501-TB

GENERAL NOTES

1. SUBMAIN AND BRANCH PIPE SIZES, FROM LOWER LEVEL MAIN TUNNEL LOOP PIPING, HAVE BEEN EVALUATED BASED ON 100% OF CONNECTED DESIGN FLOW.
2. LOWER LEVEL MAIN TUNNEL LOOP PIPE SIZES HAVE BEEN EVALUATED BASED ON 80% OF CONNECTED DESIGN FLOW, DUE TO 2-WAY CONTROL VALVES AND BUILDING COOLING LOAD DIVERSITY.
3. LOWER LEVEL MAIN TUNNEL LOOP PIPE SIZES HAVE BEEN EVALUATED BASED ON AN EAST AND WEST PORTION OF LOOP PIPING, WITH EACH SIDE ISOLATED FROM EACH OTHER ON THE SOUTH TUNNEL END BY NORMALLY CLOSED 5" BUTTERFLY VALVES.
4. PIPE SIZES SMALLER THAN WHAT WOULD BE CONSIDERED GOOD ENGINEERING PRACTICE HAVE BEEN INDICATED AS FOLLOWS:

* = PIPE SHOULD BE (1) PIPE SIZE LARGER FOR EVALUATED DESIGN FLOW.
** = PIPE SHOULD BE (2) PIPE SIZES LARGER FOR EVALUATED DESIGN FLOW.
*** = PIPE SHOULD BE (3) PIPE SIZES LARGER FOR EVALUATED DESIGN FLOW.
**** = PIPE SHOULD BE (4) PIPE SIZES LARGER FOR EVALUATED DESIGN FLOW.
