Dear Mr. Kadish:

CBIZ Valuation Group, LLC (CVG) has completed an insurance appraisal of certain property exhibited to us as part of Delta Community College located in Bay County, Midland County, Saginaw County, and Tuscola County, Michigan, and presents our findings in this report.

Purpose of the Valuation

The purpose of this engagement was to provide to Michigan Community College Risk Management Authority a property insurance appraisal for Delta Community College in connection with its internal analysis for insurance needs for the identified property as of December 8, 2025.

CVG's opinion is intended to assist Michigan Community College Risk Management Authority in making informed business decisions and it is not a recommendation. Any decision relating to insurance coverage shall remain Michigan Community College Risk Management Authority responsibility and be made solely at its discretion. This report may only be used for the specific purpose stated.

Michigan Community College Risk Management Authority is the sole intended user of CVG's report or other work product. Michigan Community College Risk Management Authority shall not reference CVG or its work in any public filing or other materials distributed to actual or prospective shareholders, investors, financing parties, or similar third parties without CVG's prior written consent.

Definition of Value

Replacement Cost New, as applicable to insurance valuations, is defined as the cost required to produce a property of like kind and materials at one time in accordance with current market prices for materials, labor and manufactured equipment, contractors overhead, profit and fees, but without provisions for overtime or bonuses for labor and premiums for materials. We did not take into consideration compliance with state or local ordinances or costs associated with demolition of property or the removal of debris.

Partial losses may result in higher replacement costs as partial losses often require a substantial amount of repair in conjunction with the replacement process. CVG's valuation methodology did not include the development of reproduction costs for ornate or historical property.

Valuation Methodology

There are three fundamental techniques applied in the valuation of assets. These techniques are based on the cost to acquire new (cost approach); the cost at which the asset may change hands in the marketplace (sales comparison or market approach); and the present worth of expected cash flows (income approach). The principle of substitution is important to the development and application of these three techniques. This principle provides that a prudent investor will pay no more for an asset, property or business than he would be required to pay for a replacement serving as a reasonable substitute of

equal utility. The cost approach is most applicable in our valuation for property insurance reporting purposes, thus the cost approach was utilized.

The three principal methods for estimating value are summarized as:

- *Cost Approach:* This approach considers the current cost of reproducing the appraised assets. The reproduction/replacement cost new of the appraised assets is estimated on the basis of current labor and material prices plus allowances for overhead, profit and provisions for mechanical and engineering fees, supervision and other miscellaneous fees.
- *Sales Comparison Approach:* This approach produces an estimate of value by comparing the subject to sales of similar items. The technique is sometimes referred to as the market approach in that it is used to indicate the value established by informed buyers and sellers in the market. Caution must be exercised in using this method since the appraiser is not always privy to the intricacies of the transaction and yet must attempt to make a valid comparison with the subject. Therefore, the sales comparison approach, although considered, was not applied.
- *Income Approach:* This approach gives consideration to the net income expectancy from the assets appraised, and to the capitalization of income in accordance with prevailing returns on properties or investments of similar risks, to determine the amount at which ownership by a prudent investor would be justified. Therefore, the income approach, although considered, was not applied.

Valuation Scope

This report includes property classified as buildings, contents, and site improvements. All other asset classifications were not included as part of the appraisal process, CVG's staff completed an inspection of the identified property located at these facilities on December 8, 2025.

- **Buildings & Structures:** CVG completed a limited scope physical inspection and valuation of buildings (structures with permanent foundations) with a replacement cost of \$100,000 or greater at the sites inspected. During the inspections, basic construction components including COPE data were observed and collected. Square footage was calculated using a combination of physically measuring the buildings, conducting take-offs of blueprints, and information made available by the Michigan Community College Risk Management Authority. Digital photos were taken of each structure inspected and incorporated into our reports and work files.
- **Contents – Modeling Approach:** CVG applied contents valuation models based on building occupancy. We performed a limited walk-through of each facility to assist in adjusting our models, as applicable. We summarized contents values on a building-by-building basis.
- **Contents – Specialized Detailed Inventory for Specialized buildings only:** Based on the Fixed Asset Register (FAR) assets with an estimated unit replacement cost greater than \$5,000 were inventoried and valued individually in buildings identified as specialized. As available, we captured the following information for these assets: location, department, description, manufacturer, model, serial number, asset/tag number and replacement cost. Assets that fell below the inventory threshold, such as furniture, were grouped and valued in aggregate for insurance reporting purposes by building.
- **Insurable Site Improvements:** Above-ground improvements associated with inspected structures (flagpoles, fencing, outdoor lighting, etc.) were recorded and valued in aggregate by site.

The valuation included a visit to the member property with analysis of other data made available to us and research of current construction costs. A detailed listing of the property appraised together with an estimate of the insurable values is contained in the summary and detail reports contained herein.

Conclusion

Our opinion, as of December 8, 2025, of the Replacement Cost New is as follows:

Description	Replacement Cost New (\$)
Buildings	446,477,000
Contents	52,187,000
Site Improvements	2,959,000
TOTAL	\$501,623,000

Some assumptions inevitably will not materialize and unanticipated events and circumstances may occur; therefore, actual results achieved may vary. We have no responsibility to update our report for events and circumstances occurring after the date of this report. The information provided to us by others is believed to be reliable, but no responsibility for its accuracy is assumed.

The values presented in this report represent conclusions based on conventional insurance reporting. They are not intended to reflect unusual circumstances or "broad evidence rule" considerations.

In a partial loss, the amount involved may be based upon repair cost which could be higher than reproduction/replacement cost new as defined in this report.

The indication of an opinion of value herein does not guarantee that a buyer or seller can be found at the amount indicated.

This report presents only summary discussions of the data, reasoning, and analyses used in the appraisal process to develop CVG's opinion of value. Supporting documentation concerning these matters has been retained in our work files. The depth of the discussion contained in this report is specific to your needs as the client and for the state intended use. CVG is not responsible for the unauthorized use of this report.

These analyses are intended to comply with generally accepted valuation methods, and our report is expressly subject to the Terms and Conditions included in our engagement letter and Assumptions and Limiting Conditions contained in this report.

Should you have any questions regarding this report, please contact Jamaal Condry at 850-320-4478.

Respectfully submitted,

CBIZ VALUATION GROUP, LLC

Contract #: 563359.1001

ASSUMPTIONS AND LIMITING CONDITIONS

This valuation by CBIZ Valuation Group, LLC ("CBIZ") is subject to and governed by the following Assumptions and Limiting Conditions and other terms, assumptions and conditions contained in the engagement letter.

LIMITATION ON DISTRIBUTION AND USE

The report, the final estimate of value, and the prospective financial analyses included therein (collectively, as used in this paragraph and the following paragraph, the "CBIZ Work Product") are intended solely for the information of the person or persons to whom they are addressed and solely for the purposes stated; they should not be relied upon for any other purpose, and no party other than the Company may rely on them for any purpose whatsoever. Neither the valuation report or its contents, nor the appraiser or CBIZ, may be referred to or quoted in any registration statement, prospectus, offering memorandum, sales brochure, other appraisal, loan or other agreement or document given to third parties. In addition, except as set forth in the report, our analysis and report are not intended for general circulation or publication, nor are they to be reproduced or distributed to third parties.

Notwithstanding the foregoing, if the Company desires to distribute or use the CBIZ Work Product in any way not expressly contemplated by these Assumptions and Limiting Conditions or the Agreement, including, without limitation and by way of example, reference to CBIZ by name or inclusion of any portion of the CBIZ Work Product in any regulatory filing, CBIZ, at our sole discretion, may permit the Company to do so for a fee commensurate to the additional risk associated with such distribution or use.

NOT A FAIRNESS OPINION

Our opinion and our report are not to be construed as an opinion of the fairness of an actual or proposed transaction, a solvency opinion, or an investment recommendation; instead, they are the expression of our determination of the fair value between a hypothetical willing buyer and a hypothetical willing seller in an assumed transaction on an assumed valuation date where both the buyer and the seller have reasonable knowledge of the relevant facts.

OPERATIONAL ASSUMPTIONS

Unless stated otherwise, our analysis (i) assumes that, as of the valuation date, the Company and its assets will continue to operate as configured as a going concern, (ii) is based on the past, present and future projected financial condition of the Company and its assets as of the valuation date, and (iii) assumes that the Company has no undisclosed real or contingent assets or liabilities, other than in the ordinary course of business, that would have a material effect on our analysis.

COMPETENT MANAGEMENT ASSUMED

It should be specifically noted that the valuation assumes the property will be competently managed and maintained over the expected period of ownership. This appraisal engagement does not entail an evaluation of management's effectiveness, nor are we responsible for future marketing efforts and other management or ownership actions upon which actual results will depend.

NO OBLIGATION TO PROVIDE SERVICES AFTER COMPLETION

Valuation assignments are accepted with the understanding that there is no obligation to furnish services after completion of the original assignment. If the need for subsequent services related to a valuation assignment occurs, including updates, conferences, testimony, preparation for testimony, document production, interrogatory response preparation, or reprint and copy services whether by request of the Company or by subpoena or other legal process initiated by a party other than the Company, the Company agrees to compensate CBIZ for its time at its standard hourly rates then in effect plus all expenses incurred in the performance of said services. CBIZ reserves the right to make adjustments to the analysis, opinion and conclusion set forth in the report as we deem necessary by consideration of additional or more reliable data that may become available.

NO OPINION IS RENDERED AS TO LEGAL FEE OR PROPERTY TITLE

No opinion is rendered as to legal fee or property title. No opinion is intended in matters that require legal, engineering or other professional advice that has been or will be obtained from professional sources.

LIENS AND ENCUMBRANCES

We gave no consideration to liens or encumbrances except as specifically stated. We assumed that all required licenses and permits are in full force and effect, and we made no independent, on-site tests to identify the presence of any potential environmental risks. We assume no responsibility for the acceptability of the valuation approaches used in our report as legal evidence in any particular court or jurisdiction.

INFORMATION PROVIDED BY OTHERS

Information furnished by others is presumed to be reliable; no responsibility, whether legal or otherwise, is assumed for its accuracy and it cannot be guaranteed as being certain. All financial data, operating histories and other data relating to income and expenses attributed to the business have been provided by management or its representatives and have been accepted without further verification except as specifically stated in the report.

PROSPECTIVE FINANCIAL INFORMATION

Valuation reports may contain prospective financial information, estimates or opinions that represent reasonable expectations at a particular point in time, but such information, estimates or opinions are not offered as forecasts, prospective financial statements or opinions, predictions or assurances that a particular level of income or profit will be achieved, that events will occur or that a particular price will be offered or accepted. Actual results achieved during the period covered by our prospective financial analysis will vary from those described in our report, and the variations may be material.

Any use of management's projections or forecasts in our analysis will not constitute an examination, review or compilation of prospective financial statements in accordance with standards established by the American Institute of Certified Public Accountants (AICPA). We will not express an opinion or any other form of assurance on the reasonableness of the underlying assumptions or whether any of the prospective financial statements, if used, are presented in conformity with AICPA presentation guidelines.
